

Connor Phung

anh.phung@torontomu.ca | vietanhphung.com | linkedin.com/in/connorphung | github.com/vietanhphung

Backend Software Engineer | Data Engineer

SKILLS & INTEREST

- **Programming Languages:** Python (FastAPI), Java/Groovy (Spring Boot), SQL, React, JavaScript (Next.js), HTML, CSS
- **Skills and Tools:** AWS (S3, Redshift), PostgreSQL, MySQL, Docker, Terraform, Airflow, MinIO, Git (GitHub, GitLab), Linux, Visual Studio, IntelliJ, PyCharm
- **Additional skills:** Atlassian Tools (Jira, Confluence), Agile/Waterfall Methodologies, Postman, Cursor, Copilot, Microsoft Office (Excel, Word, PowerPoint)
- **Certification:** AWS Cloud Practitioner (2023)

WORK EXPERIENCE

NGS / Mekong Security Tech

Hanoi, Vietnam

Backend Software Engineer (in 15-member team)

Jan 2025 - Dec 2025

- Worked on a government contract for the real-time monitoring of illegal activities on social platforms using **Python (FastAPI)**
- Designed and implemented core **REST API** services, leveraging a distributed system for national deployment
- Orchestrated scalable, asynchronous microservices using Apache **Airflow**.
- Led the integration of advanced data queries with **Elasticsearch**, improving speed for large datasets.
- Developed a media storage solution using **MinIO** (AWS S3 equivalent).
- Extended the existing **PostgreSQL** schema for new services, optimized queries, and achieved a 120% performance improvement.
- Integrated **Redis** caching, resulting in an average 60% faster data retrieval for high-demand operations.

Techlead

Hanoi, Vietnam

Backend Java/ Groovy Developer Intern

Oct 2024 - Jan 2025

- Developed, debugged, and tested Oodoo-Jira synchronization tool using **Java, Groovy (Spring Boot)**

Skill4skill (startup)

Remote - Toronto, Canada

JavaScript Developer Volunteer

Oct 2024 - Dec 2024

- Contributed to the architecture and **PostgreSQL** schema design of an online skill trade platform, implemented using **JavaScript (Next.js)**

EDUCATION

University of Texas at Austin

Remote

Master of Computer Science

Expected June 2027

Toronto Metropolitan University

Toronto, Canada

Bachelor of Computer Science (Honors) - **Distinction**

- Dean's list | Renewable entrance scholarships
- Relevant Courses: Software Engineering, Data Structures, Database Systems, Algorithms, AI, ML

PERSONAL PROJECTS

End-to-End Full-Stack Interactive LMIA Distribution Map

- **ETL** data from Canada.ca API into MySQL (CSV, JSON, XLSX)
- Created an interactive map using **Flask** and Google Maps API, visualizing LMIA distribution trends
- Added filter features for enhanced data analysis; optimized Bash commands with Make
- Github link: <https://github.com/vietanhphung/lmiaMap>

Automated ETL Data Pipeline for Air Crash Investigation on AWS

- Scraped and processed air crash data using BeautifulSoup, stored in **AWS S3**
- Built infrastructure with **Terraform**, orchestrated with **Airflow**, and containerized using **Docker**
- Secured pipeline with AWS IAM policies and simplified Bash commands with Make
- Github link: <https://github.com/vietanhphung/E2E-AirCrashInvestigation>
